

4<sup>th</sup> June 2019

Dear Colleague

you will be aware that a partnership of NHS national bodies is currently overseeing the development of a National Wound Care Strategy. This strategy encompasses pressure ulcers, lower leg wounds and surgical wounds.

At the April meeting of the Strategy Board it was agreed that we would arrange an event to engage directly with industry partners to share the progress that has been made to date in developing the strategy and establish a dialogue to support successful industry engagement with the programme. We are keenly interested in partner organisations who are developing digital applications to support care of the wound in this respect to ensure these developments are consistent with the emerging national strategy.

To this end we intend to hold a half day on the morning of Friday the 19th July at a venue in London (venue TBA). We would like to extend an invitation to you to attend this event. It will take the format of sharing the national work and also related work around data standards, interoperability, information governance and evidence standards. There will be the opportunity for questions and answers and also some workshop style discussions to draw out points of action. If you would like to attend event please register on line at:

<https://www.eventbrite.com/e/wound-care-strategy-industry-engagement-event-tickets-62907956391>.

To manage numbers we would want to limit attendance to **two** delegates per organisation.

Dr Mike Burrows  
Coordination Director  
The AHSN Network
